CORPORATE

STRONG – DEPENDABLE – PROFESSIONAL

Modu-Loc's commitment is simple – backed by an outstanding team, we provide attractive, quality site containment solutions to keep our customers and their sites safe and protected.

With multiple locations across Canada providing nationwide coverage, we have been servicing our customers in **construction, special events, retail and the municipal sector** since 1996. With over 3 million feet of fence in inventory, Modu-Loc is well-equipped to handle major, long-term infrastructure projects and emergency jobs alike.

Organizations such as the RCMP and CSIS have trusted Modu-Loc fence products to provide security at high-profile events, including the Vancouver Olympic Games, G20 Summit, APEC Conference, President's Cup, TORONTO 2015 Pan Am / Parapan Am Games, and 2022 Canada Games.

ORGANIZATIONS WE SUPPORT

Modu-Loc is a proud partner of **Habitat for Humanity Canada** and **Threads of Life**. Partnering with these organizations is one way we demonstrate our core values of Family & Well-being and Safety & Accountability.

OUTSTANDING CUSTOMER SERVICE

All things considered, our customer service is what truly differentiates Modu-Loc from the competition. Our delivery and installation crews - known as **Modu-Loc 'Field Specialists'** - are trained professionals who understand the security, accessibility and image requirements of our customers. We provide emergency response, a quality product, and expert recommendations concerning fence placement and crowd control.

BUILDING A PARTNERSHIP

No matter the project, our approach is always to work closely with our clients to identify site requirements and ensure that all criteria are met. For us, success lies in delivering peace of mind to our customers.

At Modu-Loc Fence Rentals we are known for the strength and durability of our fencing products, and the unparalleled service and expertise we provide to our customers. **Call 1.800.522.8371** to be directed to the nearest regional office.

OUR CORE VALUES

At Modu-Loc, our core values serve as the code of conduct observed by every one of our employees. The core values help to ensure that our customers receive the very best service in the industry.

CONSTRUCTION

THE MODU-LOC FENCE SYSTEM

The **Modu-Loc fence system meets and exceeds the requirements for site safety and security.** Our standard rental fence panels are 10 feet in length and available in heights of 4, 6, and 8 feet. Modu-Loc rental panels are professionally engineered for strength and durability to provide the highest degree of security in the rental fence industry.

The fence panel's frame consists of structural steel square tubing and the interior panel design incorporates heavy gauge welded wire mesh. Our superior components - including longer caps, bases, and base extensions - work together to ensure optimal fence line integrity.

Modu-Loc is the **industry leader in innovation.** We have developed a number of leading-edge products to complement our fencing systems. Our continued focus on innovation ensures that we are able to proactively address the needs of our customers.

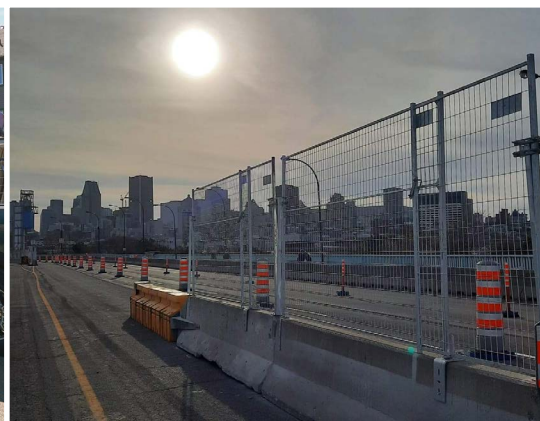

Modu-Loc's comprehensive fence systems meet and exceed the requirements for all construction site safety and security standards. Modu-Loc Fence Rentals is the industry leader, with superior service and innovative solutions to cater to the unique needs of each site.

SAFETY – reduced liability and injury prevention for both the public and onsite workers

CONTROLLED ACCESS POINTS – multiple gate systems and styles for personnel and vehicle access

SECURITY – breach deterrent systems to secure site contents

SUPERIOR INSTALLATION SYSTEMS ADAPT TO THE MOST DEMANDING CONDITIONS – uneven terrain, high winds and roadside applications

FENCE PANELS

Modu-Loc offers a range of temporary fence solutions for rent and purchase to suit a variety of requirements, no matter the size or duration of your project.

STANDARD RENTAL FENCE PANELS – Our signature temporary rental fence panels are professionally engineered for strength and durability to provide the highest degree of security in the rental fence industry. These 10' wide panels are available in 4', 6' and 8' heights.

Product Features:

- Material: Steel and heavy gauge welded wire mesh
- Interlocking steel caps ensure alignment and overall stability
- Bases may be anchored to concrete or asphalt for extra stabilization

PICKUP PANELS – A lightweight, versatile solution for basic applications. These powder-coated steel or galvanized panels are 6' x 4', making them the perfect size to fit inside most vehicles.

Product Features:

- Pickup panels are a cost-effective option for those who have basic fence requirements
- Simple to set up and take down with interlocking fence panels, bases and caps

STANDARD SALE PANELS – When renting is not an option, Modu-Loc style utility fence panels are available for purchase.

Product Features:

- Steel panels are powder-coated or galvanized for optimal longevity. Options may vary depending on location and product availability
- Simple to set up and take down with interlocking fence panels, bases and caps
- An alternative to rental fencing for customers with frequent and long-term site containment needs

SILVER PEDESTRIAN BARRICADE – These galvanized steel silver crowd barriers effectively control access and manage pedestrian traffic.

Product Features:

- 36 inches tall by 7 feet long
- 40 lbs (18 kg)
- Simple to set up and take down as required

SECURITY

Modu-Loc Fence Rentals has developed innovative security components and gate assemblies that work together to form a comprehensive breach deterrent system, providing optimum security for your site.

SECURITY CLAMPS - cannot be removed without tools and access to the back of the locking mechanism from inside the fence line.

- **Improve security** – as the fence panels cannot be disconnected
- **Increase stability** – with a third connection point for the panels

SECURITY RAILS - are a strong visual deterrent, and prove physically challenging to breach.

- **Increase security** – by keeping intruders out of the site

HIGH-SECURITY SYSTEMS - armed with data from rigorous third-party engineering tests, we have developed high-security site containment systems to answer the needs of customers requiring maximum protection and controlled site access.

ENHANCED INSTALLATION

Modu-Loc Fence Rentals offers superior installation methods that adapt to the most demanding conditions – uneven terrain, high winds and roadside applications. Modu-Loc Field Specialists are trained to assess areas of concern and make recommendations for the right accessories to accommodate every site, ensuring optimal support and stability.

ADAPTABLE INSTALLATION using longer caps, triangular bracing, and base extensions to accommodate challenging sites.

- **Achieve perimeter security and stability, even on uneven terrain**

HIGH WIND INSTALLATION including wind braces and ballast system.

- **Reduce costs** associated with damage to fence or property
- **Maintain stability** – required when hanging banners or scrim on fence

ENHANCED STABILITY with a wide variety of accessories.

- **Spikes** – driven into the ground to secure bases
- **Sand bags** – inexpensive and portable option to improve stability when ground penetration is not possible
- **Wind braces** mount to our fence and anchor into the ground at an angle to prevent the fence from tipping or blowing over

ADVANCED SYSTEMS

Modu-Loc Fence Rentals offers complete systems for specialized applications. As the industry leader in innovative products, we pride ourselves on our ability to stay one step ahead of our customers' needs.

FENCE ON JERSEY BARRIER SYSTEM – for roadside applications, Modu-Loc fence panels can be mounted on concrete jersey barriers with saddle mounts or bolted plates, providing additional safety and security. Our award-winning fence on jersey barrier system reduces installation time and costs compared to other mounted barrier systems.

ECHO BARRIER® – for cost-effective noise management. Widely endorsed and certified, Echo Barrier's patented acoustic barriers are suitable for short-term and long-term projects requiring noise mitigation.

Benefits include:

- Achieves noise reduction between 10 dB and 32 dB
- Water-resistant and flame-retardant
- Recognized by the Noise Abatement Society and the Institute of Acoustics

CONCRETE BLOCK BALLAST SYSTEM – engineered to meet the Canadian Building Code, our ballast system is comprised of heavy concrete blocks and wind braces spaced at 20' intervals along the fence line. This system prevents the fence from being knocked over, and is designed to resist wind loads adopted by the Structural Engineering Institute / American Society for Civil Engineers, Building Code. The size and spacing of the concrete blocks can be tailored to suit specific site requirements.

MODU-BARRIER – Modu-Loc's high-security Modu-Barriers are perfect for short-term projects and smaller installations. Ideal applications include propane compounds, track maintenance, and construction sites requiring greater security than cannot be achieved with temporary fence alone. Modu-Barriers are suitable for non-roadside applications only.

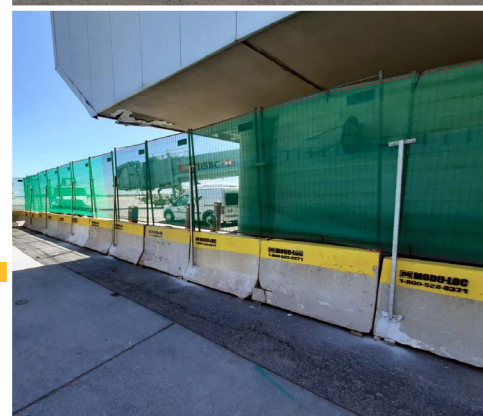

SAFETY PRODUCTS

Modu-Loc offers a wide range of quality safety products to provide greater protection for onsite workers and the public.

SAFETY RAMPS – slide onto fence bases to provide a smooth transition for wheeled equipment, and to help reduce pedestrian tripping hazards.

DELINEATORS – 42" - 45" tall and available in a variety of styles with different handles. Loopers and T-tops come with a weighted black base.

DELINEATOR BOOTS – all of our delineators can be outfitted with a metal boot and attached to Modu-Loc fence bases, further reducing tripping hazards, preventing theft and improving the barrier between live construction sites and pedestrians.

FENCE SCREENING

Modu-Loc offers several different styles of screen to suit a variety of requirements and applications. All Modu-Loc screening is water repellent, UV resistant and designed to control dust and debris.

PRIVACY SCREENING – Ideal for construction sites or any area where limiting visual access or containing dust and debris is required.

- Up to 98% opacity
- Can be cut to length without running
- Black and green carried in stock; other colours available as special orders

DEBRIS NETTING - Modu-Loc offers an affordable, lightweight and durable polyethylene debris netting to help contain dust and debris on active construction sites. Modu-Loc's debris netting is versatile, as it can be hung horizontally or vertically and may be cut to length without running.

- 40% opacity
- Lightweight
- Flame retardant

GATE ASSEMBLIES

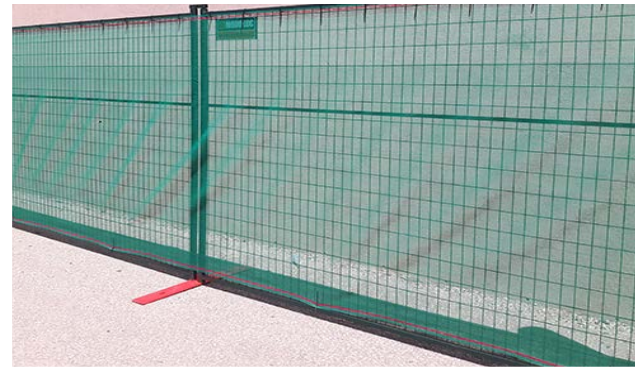

Modu-Loc fence systems include pedestrian and vehicle access gates. Our gates can be placed anywhere in the fence line, allowing for effective control of access points.

PERSONNEL AND VEHICLE ACCESS – options include sliding gates, integrated man-door panels, hinged swing gates and wheeled bases.

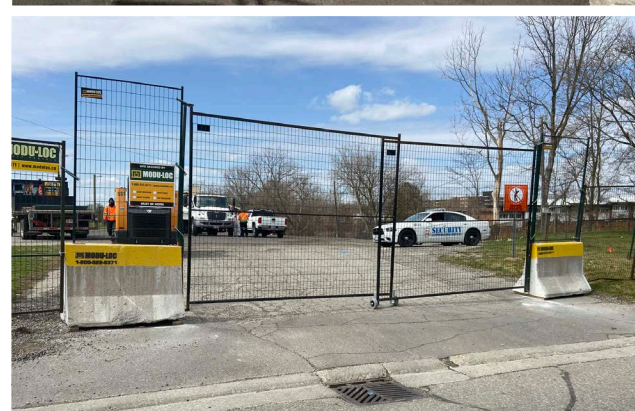

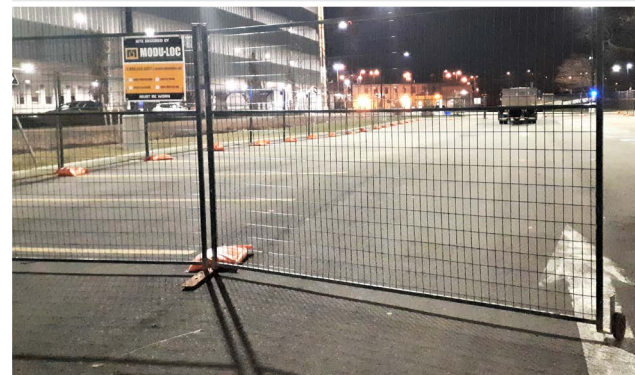

ALL-TERRAIN OPTIONS – larger wheels for rough or uneven surfaces.

VISIBLE ACCESS – integrated hi-vis gate systems that stand out from the rest of the fence line.

INCREASE SECURITY – with controlled access points.

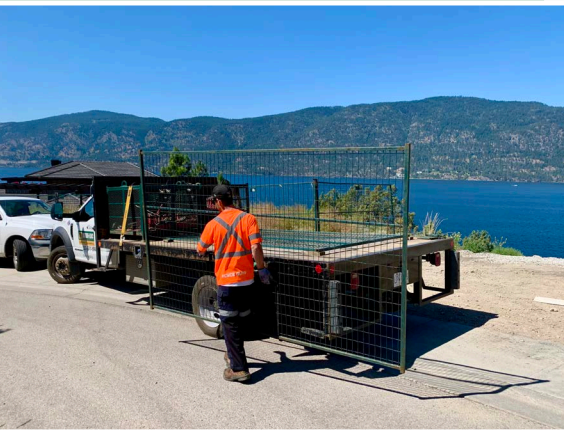

URING WHAT MAT

Providing industry-leading site containment solutions nationwide
